THE ILLUMINATIONS.
SUBJOINED we give a list of intended illuminations by which the British other residents of Hongkong propose manifesting their pleasure at the visit

H. R. H. the Duke of Edinburgh this Colony. We have compiled it order that our readers may have their currouty directed in searching for th chief features of the display. It is Doe sible, perhaps probable, that some which from their magnitude or beauty ough to be included in the list, have been omitted: Any such omission we shall be happy to rectify on being informed of it and we hope to make the list as complet as possible for our Overland editions which the whole proceedings relating the Prince's reception at Shanghai, as well as at Hongkong, will appear. Th illuminations generally are on a scal much larger and more universal than was anticipated, so much so, indeed, tha will not be possible to view them a in one evening. We venture to suggest therefore, that there may be a second hight of exhibition, at any rate of the principal transparencies and designs; and as the China-Mail is always prepared to accept the consequences of its own counsel, we shall if necessary set the example of a double illumination, our devised entirely by ourselves

MESSES, AUGUSTINE, HEARD AND CO. Six transparencies, three on each floor the lower consisting of a \$1000 Greenback (17 de by 12 ft.), with allegorical figures of tiope and Peace on either fide. The upper three have the United States motto Pluribus Unum, surrounded by the flags the different States, in the centre, with the arms of Massachussets and New York The building is surmounted by the Stars and Stripes and the general effect is most

THE WANCHAL BAKERY OFFICE. Two transparencies (18 ft. by 9 ft.) The Bakers Arms with With greeting to the English Prince" for a motto. other a very excallent allegorical picture Faith, Hope, and Charity one of the mo successful of the artist's productions.

THE GERMAN CLUB. Three transparencies ; the Centre "Germania," an allegorical figure on a white ground, with the German arms on one side and the British on the other. The windows and cornices of the upper story of building are surrounded with gas jets and t is much to be regretted that the roadway affords so little room for seeing this very successful illumination in its entirety.

MESSRS. RUSSELL AND CO. Five transparencies, the three lower consisting in a chromatrope star Welcome "on the ribband, and figure representing "Prudence" and "Plenty on one side and "Justice" and merce "on the other. The star of set has excited great admiration, and gas fittings are most successfully applied to do justice to the painting, "Plenty" is regarded by some as the best painting of ing the cross part. HE "TREATY PORTS OF CHINA & JAPAN," AND "NOTES AND QUERIES ON CHINA AND JAPAN." EXTRACTS FROM REVIEWS.

From the "Straits Times," July 27, 1868.) Some time ago we had occasion to remark upon the progress that Literature as represented by the Press had made and was making in the East, and our attention has again been called to the subject by the receipt of a Hongkong publication which deserves some notice and which we have much pleasure in introducing to the knowledge of our readers. We allude to Notes and Queries on thing and Japan, published monthly by Mr Saint, the proprietor of the China Mail newspaper. This publication is well printed on good paper, and in aize and shape is very like its well-known namesake or prototype at home, and is equally a mine containing very curious and useful information regarding the language, litersture, history, manners and customs of the Chinese and in a less degree of the Japanese. It says a good deal for the extent and stability of the footing of Europeans in China, that such a publication as this should be established and conducted with apparently successful vigour.

The publication is altogether a very interesting one, and wishing it every success, we commend it to the attention and support of our readers.

(Brom the "Friend of India," June 4, 1868. We scknowledge with thanks the receipt of the numbers for the current year of Notes and Queries," a most deserving Angle Chinese monthly, edited by Mr N. B. Dennys, whose "Treaty Ports of Chins and Japan " are so well known. From the names attached to the "Notes" we can see that the contributors include some of the best Chinese scholars in the East. Its interest is not confined to China, and it will be of valuable assistance to all scholars, who have directed their attention towards the subject of Buddhism and its literature, and generally to all who are interested in oriental antiquities. It deserves to be better

known in India. (From the "London Examiner." May

This really useful volume ["Treaty Ports of Ohina and Japan "] is intended as a guide for travellers and residents in China and Japan, and as a book of reference for mercantile, men generally. It contains an account, historical and political of all the open ports of these countries, together with Peking, Yedo, Hongkong, and Macad. has been carefully compiled and edited by Mr N. B. Denuys; and the elaborate maps and plans, with which the work abounds

considerably enhance its value. * * * We have thus given in outline some of the more prominent portions of the chapter devoted to Canton as a specimen of the whole volume. Other chapters treating of Macao, Formosa, Ningpo, Shanghae, and the remainder of the treaty ports, we can enumerate. The pages describing Peking, the capital, are so interesting, and contain so much that is new to European readers respecting its history, public buildings, and general characteristics, that we would fain transfer them to our columns. A complete and intelligible plan of the Imperial City and neighbourhood, gives us an

accurate notion of the relative position of its divisions, streets, and places. In the introductory chapter to the notices of the Treaty Ports of Japan will be found a succinct history of that Empire, together with remarks on its government, geography, and limits, which will be found particularly interesting as throwing a considerable light on a part of the world so long entirely, and

still comparatively, unknown to Europeans. The descriptions of Nagasaki, Yedo, Yokohanis, and the other Treaty Ports of Japan, are as elaborate and entertaining as those of the Chinese ports. A copions index and a useful appendix containing many hints and much appropriate advice to travellers and others, is also included in the volume. The entire work affords a vast amount of information, pleasantly written, and we doubt not will be perused with interest by many who will never visit the
